HOTEL TRAVEL TRENDS

We looked at:

Which destinations are gaining popularity?

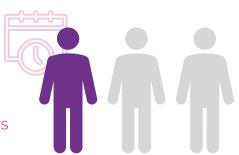

How far in advance do travelers book by destination?

How many searches do they make?

Our key findings include:

More than one in three travelers to New Orleans, Las Vegas, Orlando and Washington DC booked hotels more than 30 days in advance.

More price conscious 20-29 year-olds conduct roughly 10 searches prior to booking hotels.

More exotic destinations focused on holidays have a higher number of searches than more businessfocused destinations.

Average searches prior to hotel bookings

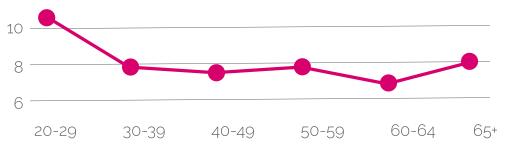

The number of travelers tends to correlate with the number of searches prior to booking

Younger travelers, on average, search more prior to booking hotels.

Travelers 20-29 are more resourceful and price conscious, conducting 10 searches on average prior to booking a hotel. We also see a slight uptick for retirees over 65, conducting on average eight searches prior to booking a hotel.

More exotic locations warrant additional searches

Unsurprisingly, destinations which tend to be focused on holiday travel have higher searches on average. Hotels in the Caribbean represent over 1.3% of all hotel searches, but only 0.5% of bookings showing an index of 267 searches/bookings. In contrast, the share of bookings to Frankfurt is actually higher than the share of searches.

Key Takeaways

- Several markets grew in popularity for hotel bookings from 2015 including Philadelphia, New Orleans, Boston and Miami.
- There is large variability in advance booking for hotels depending on the popularity of the destination (especially for conferences and family vacations).
- Those traveling with families, as well as travelers 20-29 have a higher number of searches prior to booking. More exotic destinations have a higher share of searches compared to bookings.
